30 January 2018

YOUR REF: **Attention: All Bidders**

Dear Sir/Madam,

OAB-PROD-4156- Design, Manufacture, Supply, Testing and Commissioning of Indoor Medium Voltage Switchgears, Gas Insulated at Fort George Power Station

Clarification No 1

Please find below CEB's reply to queries from a bidder in respect of the abovementioned bidding exercise.

Query 1

Can you clarify whether we need to provide civil work for this project? Such as cable trench, cement base for switchgears, etc?

Reply 1

Please note that the civil work is NOT required. The new switchgear shall be installed on an existing reinforced concrete base in the Power Station. Furthermore, the installation works shall be carried out by the CEB. Existing cable trenches shall be used for laying of cables, wherever required.

Query 2

If civil work is NOT included, how can we make sure the existing cement base is suitable for our equipment?

Reply 2

Please note that the existing civil infrastructure at our facility presently holds other electrical panels and have been designed for these purposes. As stated in the Bidding Document "Bidders are encouraged to visit and examine the site and its surroundings at their own cost and obtain all information that may be necessary for preparing the Bid" CEB shall attend to any request made for site visit

Kindly acknowledge receipt of this letter addressed to the Chairman Tender Committee at ctc@ceb.intnet.mu at latest by 02 February 2018.

Yours faithfully,

J. Moorghen
Officer in Charge
(Supply Chain Dept)
