

CENTRAL ELECTRICITY BOARD

Supply to Projects Involving Mixed Activities

1. With the socio-economic development of Mauritius in recent years as well as the emergence of new business models, there has been a growth in the number of projects comprising a mix of different activities.
2. These projects usually include a combination of domestic-commercial and/or industrial activities, as defined under General Notice No. 516 of 1964.
3. The capital contribution for developing the electrical infrastructure to supply such projects has, at all times, been treated as non-refundable.
4. We are pleased to inform our customers and the public at large that, as from 01 December 2016, a new payment scheme is effective for the benefit of some defined customer categories regarding projects that comprise a mix of different activities.
5. The new payment scheme is applicable to potential Small and Medium Enterprises as well as private individuals, in respect of a load request not exceeding 50 kVA.
6. Under the new payment scheme, the applicants falling in the above-mentioned categories are entitled to a payment facility equivalent to a 50% immediate down-payment (non-refundable), up to a maximum of Rs 250,000.
7. All concerned customers are requested to contact our Customer Service Centres for more information on the new scheme.
